

Java

```
class Solution {  
    public int scoreDifference(int[] nums) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number}  
 */  
var scoreDifference = function(nums) {  
  
};
```

TypeScript

```
function scoreDifference(nums: number[]): number {  
  
};
```

C++

```
class Solution {  
public:  
    int scoreDifference(vector<int>& nums) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int ScoreDifference(int[] nums) {  
  
    }  
}
```

Kotlin

```
class Solution {  
    fun scoreDifference(nums: IntArray): Int {  
  
    }  
}
```

Go

```
func scoreDifference(nums []int) int {  
}
```
